PROFILE

Hello, my name is Khang Phuc Nguyen. I am a first-year student majoring in Computer Science and Engineering at the University of Oulu in Finland. Although I am just beginning my academic journey, I am excited to explore the world of technology and deepen my understanding of the field. I am eager to learn and develop the skills necessary to tackle challenges and contribute to innovative solutions in the future.

PROJECTS

Cake Shop   *2024*

React.js, Node.js, Express, MongoDB

- Offer a creative website with convenient features for customers who want to buy cakes.
- Provide details about the cakes, an introduction to the shop, payment methods, and options to sign up/sign in and change the password.
- Customers can add cakes to the cart after signing in and proceed to a fake payment process.

Live demo: https://cake-shop-sigma.vercel.app/

Quizz Web   *2024*

React.js

- The website features multiple-choice questions where you can choose to answer or skip.
- In each question, you have around 7 seconds to respond; if you don't respond in time, the website will automatically move to the next question.
- After completing the tasks, you will receive a score based on the number of correct answers you chose.

Live demo: https://quizapp-eight-alpha.vercel.app/

TodoList   *2024*

Typescript, Golang(Fiber), Chakra UI, MongoDB

- The ToDoList website offers an user-friendly interface with easy navigation for managing your to-do list.
- There are many useful features including add, mark as completed, or delete individual tasks, with the option to clear all tasks or only those marked as finished.
- Simple, intuitive design that makes task management efficient and convenient.

EXPERIENCE

Ho Chi Minh city University of Education

React.js, Node.js, Express, MongoDB

- Develop a website to document and highlight the activities and initiatives of the Chinese Department Student Association at Ho Chi Minh City University of Education, creating an interactive platform for showcasing the vibrant community and its ongoing activities.
- Users can sign in with a shared email and then add, filter, delete, or search for activities.
